ABSTRACT (Limit to 1400 spaces, i.e., approximately fifteen single-space typewritten lines) (16)

At 1630 on 7-16-84, it was determined that a continuous fire watch had not been posted in the CCW heat exchanger and pump room as required by Technical Specification 3.7.11.2. A fire watch was posted immediately and maintained until no longer required. Health/Safety of the public was not affected.

TEXT (If more space is required, use additional NRC Form 386A's) (17)

Fire protection sprinkler systems 1A-27 and 1A-119 were placed in override at 1248 on 7/16/84 to allow Maintenance personnel to perform grinding and welding operations in the CCW heat exchanger and pump room. Technical Specification 3.7.11.2 requires a continuous fire watch to be posted within one hour whenever these systems are inoperable. However, at 1630 it was determined that no continuous fire watch had been posted, although Maintenance personnel had been in the area intermittently. A continuous fire watch was posted immediately and maintained until no longer required.

This event was due to personnel error. The Shift Foreman did not provide adequate fire watch instructions to the maintenance personnel, and did not ensure that the fire watch requirements were met. The individual has been counseled and this incident will be discussed with all Operations personnel responsible for ensuring that fire watch requirements are met.
