

CENTRAL FILES/DOCKET /PIDS TE:09 Per NUCLEAR REGULATORY COMMISSION

WASHINGTON D.C. 20666

Docket No.: 50-331

April 22, 1992

MEMORANDUM FOR:

Helen Pappas, Chief

Administrative Management Branch Division of Resource Management

and Administration

Region III

FROM:

Leif J. Norrholm, Chief Vendor Inspection Branch Division of Reactor Inspec

Division of Reactor Inspection

and Safeguards

Office of Nuclear Reactor Regulation

SUBJECT:

ACCESS TO RADIOLOGICAL, VITAL, AND PROTECTED AREAS AT DUANE

ARNOLD ENERGY CENTER, REVISION 1

Please forward the following revised information to Iowa Electric Light & Power Company in connection with the visit by the persons listed below of this office to the Duane Arnold Energy Center facility on May 11-15, 1992.

This certifies that the persons listed below have attended generic physical security and radiation protection (10 CFR 19.12) training within a one-year period preceding the planned visit dates indicated and are capable of safe conduct in a radiologically restricted area. Accordingly, they should be granted unescorted access to all plant radiological areas, except those requiring respiratory protection, following the site-specific information briefing and security badging.

This also certifies that these persons are employees of the U.S. Nuclear Regulatory Commission. To my knowledge, they do not exhibit adverse character traits or aberrant behavior. Their Q access authorization means that they have been screened to the national level (including a criminal records check); no disqualifying offenses were noted. Trustworthiness was determined by a review of their employment records. On this basis, I recommend that they be granted unescorted access to the vital and protected areas of the facility.

A Q access authorization normally is based on a favorable full-field background investigation conducted by the Office of Personnel Management (OPM), the Federal Bureau of Investigation (FBI), or another U.S. Government

CONTACT: Robert L. Pettis, Jr., NRR (301) 504-3214 agency that conducts personnel security investigations. A full-field investigation, as a minimum, covers the previous 5 years and includes a credit check, a check of local law enforcement agencies, as well as appropriate educational institution(s), and personnel interviews with the subject, supervisors, co-workers, neighbors, persons given as references, educators, or other personnel, if appropriate. It also includes a check of the records and files of various national agencies, including OPM, FBI fingerprint, criminal, and subversive files, and of other agencies (e.g., Department of Defense, Central Intelligence Agency, and Immigration and Naturalization Service), as appropriate.

An L access authorization for NRC employees is based on a check of records and files of various national agencies, including OPM, FBI fingerprint, criminal and subversive files, and other agencies (e.g., Department of Defense, Central Intelligence Agency, and Immigration and Naturalization Service), as appropriate. In addition, written inquiries are made to persons given as references, as well as to employers, supervisors, educational institutions, and to the local law enforcement agencies in those areas in which the individual has resided or worked within the last 5 years.

The following specific security clearance information is provided.
