Mr. James G. Keppler  
 Regional Administrator  
 U.S. Nuclear Regulatory Commission  
 Region III  
 799 Roosevelt Road  
 Glen Ellyn, IL 60137

Subject: Byron Station Units 1 and 2  
Radiological Respiratory Protection Program  
NRC Docket Nos. 50-454/455

Dear Mr. Keppler:

Pursuant to 10 CFR 20.103(g), the purpose of this letter is to provide written notification to your office at least thirty days prior to the date that respiratory protective equipment will first be utilized under the provisions of 10 CFR 20 at our Byron Station.

The "potential" date for the first use of respiratory protective equipment is fuel load on September 15, 1984. The Byron Station Respiratory Protection Program has been under development for some time. We now consider our program complete and ready for NRC Region III inspection.

Please advise this office of your intentions in this matter.

Very truly yours,

E. Douglas Swartz  
 Nuclear Licensing Administrator
