August 13, 1984

Mr. John Barrow, Chairman
Combustion Engineering Owners Group
Operations Subcommittee
Florida Power and Light Company
P. O. Box 128
Ft. Pierce, FL 33454

Dear John:

This letter is to confirm the meeting on August 29, 1984, in Bethesda between the Operations Subcommittee and NRC. The purpose of this meeting is to discuss the task analysis requirements of Supplement 1 to NUREG-0737 and open items in the staff Safety Evaluation Report on CEN-152. More detail is provided in the enclosed meeting notice. Hopefully, this meeting will reduce the information needed from each CE plant owner and will expedite NRC reviews of plant-specific submittals.

I appreciate the willingness of your Subcommittee members to support such a meeting. We look forward to seeing you on the twenty-ninth.

Sincerely,

[Original Signed by
Hugh L. Thompson, Jr.
