SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION
DOCKET NOS. 50-445 AND 50-446
SURVEILLANCE AND MAINTENANCE PROGRAM
FOR ENVIRONMENTAL QUALIFICATION

Dear Sir:

The Qualification Maintenance Program for the Comanche Peak Steam Electric Station (CPSES) is described in Section 2.4 of Appendix 3A of the CPSES FSAR. This program will be fully implemented prior to fuel load for CPSES Unit 1. "Fully implemented" means that the program is in place to meet all the FSAR commitments and that the maintenance/replacement requirements for all the Class 1E equipment that require environmental qualification have been identified. These requirements have been submitted to our maintenance group and will be incorporated in the automated program for each item before any action is required.

Respectfully,

H. C. Schmidt for

H. C. Schmidt
