Dear Mr. Russell:

In the Referenced letter, we submitted our resolution of Unresolved Safety Issue A-46, which dealt with seismic qualification of components. We have been advised that two pages were inadvertently omitted from the first attachment to the referenced letter. This letter provides those pages. Upon review of the original submittal, we have found that two versions of page 8-2 in the first attachment were included. Attached to this letter is the correct version of that page as well as pages 8-1 and B-36, which were omitted. Please insert these pages in your copy of the referenced letter attachment.

Sincerely,

Keith D. Young
Manager, Nuclear Licensing
