

ENCLOSURE 1

NOTICE OF VIOLATION

Nebraska Public Power District
Cooper Nuclear Station

Docket: 50-298
License: DPR-46

During an NRC inspection conducted on November 6-9, 1995, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," (60 FR 34381; June 30, 1995), the violation is listed below:

Criterion V of Appendix B to 10 CFR Part 50 states, in part, that activities affecting quality shall be prescribed by documented procedures, of a type appropriate to the circumstances, and shall be accomplished in accordance with these procedures.

- Procedure NTI 03, "Revision to Training Materials," Revision 16.0, states, in part, that revisions which modify the content of training materials shall be documented on a revision/change summary form. Additionally, Procedure NTI 03 states that the lead instructor shall review the draft revisions and changes, initial the revision/change summary form, and forward it to the appropriate nuclear training supervisor for review and approval.
- Procedure 9.3.4.8, "Eberline Personnel Contamination Monitor Model PCM-1B," Revision 5, Section 8.1.4, states, "If the monitor alarms after recount, contact Radiological Protection for further evaluation."
- Procedure 9.1.6, "Personnel Contamination," Revision 20.2, Section 6.1, states, in part, "An entry on CNS RP-8, PCM Alarm Log, is required when two consecutive PCM-1 alarms occur." Procedure CNS RP-8, "PCM Alarm Log," requires such items to be recorded as: date and time of the contamination, name of the individual and location of the work area, and initial and final contamination levels.

Contrary to the above,

- On November 8, 1995, the inspector identified that in September 1995, training material lesson plans and site-specific radiation protection test material were changed without documenting the revisions on a revision/change summary form, and without having the review of the lead instructor and without review and approval of the appropriate nuclear training supervisor.
- On November 6, 1995, the inspector identified that two workers failed to follow Procedure 9.3.4.8 and Radiation Worker Training Student Text, in that, the workers did not contact radiation protection after alarming the personnel contamination monitor.

- On November 6, 1995, the inspector identified that a radiation protection technician failed to follow Procedure 9.1.6. in that, the technician did not obtain and record information such as: date and time of the contamination, name of the individual and location of the work area, and initial and final contamination levels.

This is a Severity Level IV violation (Supplement IV) (298/9516-01).

Pursuant to the provisions of 10 CFR 2.201, Nebraska Public Power District is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because the response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. If personal privacy or proprietary information is necessary to provide an acceptable response, then please provide a bracketed copy of the response that identifies the information that should be protected and a redacted copy of the response that deletes such information. If Nebraska Public Power District (Licensee) requests withholding of such material, Licensee must specifically identify the portions of the response that Licensee seeks to have withheld and provide in detail the bases for Licensee's claim of withholding (e.g., explain why the disclosure of information will create an unwarranted invasion of personal privacy or provide the information required by 10 CFR 2.790(b) to support a request for withholding confidential commercial or financial information). If safeguards information is necessary to provide an acceptable response, please provide the level of protection described in 10 CFR 73.21.
