

ENCLOSURE 1

NOTICE OF VIOLATION

Georgia Power Company
Hatch Unit 1

Docket No. 50-321
License No. DPR-57

During the NRC inspection conducted on October 1 - November 11, 1995, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," NUREG-1600 (60 FR 34381, June 30, 1995), the violation is listed below:

10 CFR 50, Appendix B, Criteria V, Instructions, Procedures and Drawings, requires, in part, that activities affecting quality shall be prescribed by documented instructions and shall be accomplished in accordance with these instructions.

Procedure 34SO-R43-001-1S, Diesel Generator Standby AC System, Revision 16, step 7.4.1, in part, requires that Attachment 7, Diesel Generator Fuel Oil System Restoration, be completed after the transfer of fuel oil between storage tanks. This attachment contains a list of valves whose positions are to be verified for returning the fuel oil transfer system to standby. Valve IR43-F006A, 1A storage tank transfer pump discharge valve, is required to be closed by this attachment.

Contrary to the above:

On October 13, Valve IR43-F006A was open during the receipt of diesel fuel. This resulted in fuel oil from a tanker truck being inadvertently pumped into the 1A day tank. Approximately 350 gallons of fuel oil overflowed from the day tank and partially flooded the day tank room.

This is a Severity Level IV violation (Supplement 1).

This violation is applicable to Unit 1 only.

Pursuant to the provisions of 10 CFR 2.201, Georgia Power Company is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector, Hatch Nuclear Plant, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper

should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because your response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if you find it necessary to include such information, you should clearly indicate the specific information that you desire not to be placed in the PDR, and provide the legal basis to support your request for withholding the information from the public.

Dated at Atlanta, Georgia
