April 20, 1992

TELEPHONE
AREA CODE 716 246 7700

U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555

Gentlemen:

Enclosed are 4 copies of the "Robert E. Ginna Nuclear Power Plant Security Plan", Revision F, dated April 20, 1992. The revision is being submitted under the provisions of 10CFR50.54(p) as it does not degrade the security of the plant.

Revision F is being submitted at the request of Nancy Ervin, Reactor Security Specialist, Primary Access Authorization License Reviewer for the Office of Nuclear Reactor Regulation, to further clarify the Personnel Access Authorization Program commitments submitted in Revision D on February 3, 1992 and Revision E on March 30, 1992.

As in our previous correspondence submitted with Revisions D and E, Rochester Gas and Electric Corporation certifies that the changes in Revision F implement all elements of the Code of Federal Regulations Part 10 Section 73.56, Personnel Access Authorization Requirements for Nuclear Power Plants, and Regulatory Guide 5.66, dated June 1991, Access Authorization Program for Nuclear Power Plants.

To facilitate NRC review, changes are highlighted by side-bars and a revised "List Of Effective Pages" is included.

The enclosures to this letter contain Safeguards Information which should be protected from public disclosure per Part 73.21 Code of Federal Regulations.

Very truly yours,

Robert C. Mecredy
Vice President
Ginna Nuclear Production
