Re: Part II Title 10 CFR 19 et al

Dear Secretary:

It has come to our attention that the Proposed Rule published in the Federal Register on January 9, 1986, "Standards for Protection Against Radiation" calls for an increase of the "acceptable" radiation exposure levels.

It is our understanding that if any changes are to be made they should reduce the current legally acceptable levels, not increase them.

Since it is the job of the NRC to protect public health, we strongly object to this proposed rule change.

At the very least, a public hearing should be held before such a rule change could take place, and an Environmental Impact Statement must be prepared.

Very truly yours,

W. Gold
William J. Gold, Esq.
