AMENDMENT TO FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request by Duquesne Light Company (the licensee) to withdraw its April 14, 1993, application for a proposed amendment to Facility Operating License No. NPF-73 for Beaver Valley Power Station, Unit 2 (BVPS-2), located in Beaver County, Pennsylvania.

The proposed amendment involved revision of Table Notation (10) of Table 4.3-1 of Technical Specification 4.3.1.1.1. The proposed revision would have added a footnote to Table Notation (10) that would have stated: "Complete verification of OPERABILITY of the manual reactor trip switch circuitry shall be performed prior to startup from the first shutdown to Mode 3 occurring after April 6, 1993."

The Commission has previously issued a Notice of Consideration of Issuance of Amendment in the FEDERAL REGISTER on April 27, 1993 (58 FR 25676). However, on December 23, 1993, the licensee submitted a letter to the NRC requesting withdrawal of the proposed change because the change was no longer required. BVPS-2 had entered Mode 3 on September 18, 1993, in preparation for its fourth refueling outage and had performed the required surveillance test on November 18, 1993.

For further details with respect to this action, see the application for amendment dated April 14, 1993, and the licensee's letter of December 23, 1993, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, 20555 and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Dated at Rockville, Maryland, 19th day of December 1995.

FOR THE NUCLEAR REGULATORY COMMISSION

Donald S. Brinkman, Senior Project Manager
Project Directorate I-2
