June 26, 1984  
L-84-159

Mr. James P. O'Reilly  
Regional Administrator, Region II  
U. S. Nuclear Regulatory Commission  
101 Marietta Street, Suite 2900  
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

Re: St. Lucie Unit 1  
Docket No. 50-335  
IE Bulletin 82-02

Florida Power & Light Company has completed the balance of the actions requested by the NRC in IE Bulletin 82-02 for St. Lucie Unit 1. The response to action item 3 of the bulletin was previously provided in letter L-82-322 dated August 2, 1982. The written report requested in action item 4 is attached to this letter.

This completes FPL's response on the bulletin.

Very truly yours,

J. W. Williams, Jr.  
Group Vice President  
Nuclear Energy

Re: St. Lucie Unit 1  
Docket No. 50-335  
IE Bulletin 82-02

Response to Action 4

- a) We have implemented Maintenance Procedure M-0039 which includes the threaded fastener practices as required in the above-referenced Bulletin. Fastener lubricant criteria was addressed in our letter L-82-322 (dated 8/2/82).  
  
This completes Action Item 1.
- b) During the 1984 outage of Unit 1 both steam generator manways (total of 4) and the pressurizer manway were opened for maintenance and the subject fasteners were inspected.
- c) The fasteners for the closures were examined and found to have no degradation. These fasteners were examined in the removed condition except for 5 which had to be drilled out because of galling. All studs and nuts were replaced as part of a plant modification (027-183) to improve the torquing methods used on these closures.
