Perry Nuclear Power Plant  
Docket No. 50-440  
Clarification of Format Regarding the Effect of Issued License Amendments  
on Currently Pending License Amendment Requests

Gentlemen:

In response to a request from Mr. Jon B. Hopkins, NRC Project Manager for Perry, attached is information regarding the format of Technical Specification pages to be issued with pending license amendments. Attachment 1 reflects the Response Time Testing amendment request submitted on May 1, 1995 (PY-CEI/NRR-1932L). Attachment 2 reflects the amendment request for Replacement of Selected Analog Leak Detection System Instruments with GE NUMAC Leak Detection Monitors submitted on November 22, 1993 (PY-CEI/NRR-1654L). These updates are provided as a result of amendments issued since the above requests were submitted and do not constitute changes to the original amendment requests.

If you have questions or require additional information, please contact Mr. James D. Kloosterman, Manager - Regulatory Affairs, at (216) 280-5833.

Very truly yours,

TAH:vh
