Revision O of LER 034 was submitted on May 11, 1984 describing drywell temperature indications above 150°F. Revision 1 of LER 034 was issued to report that on July 3, 1984 drywell temperature monitor CMS-TI-55 indicated above 150°F. This revision is being issued to report that on August 4, 1984 drywell temperature monitor CMS-TI-55 indicated above 150°F for a period of greater than 8 hours, and thus, also falls into the reporting category of Technical Specification requirement 3.7.8.a. This condition is a continuation of the original problem addressed in Revision O and Revision 1.

The average drywell temperature did not exceed 135°F as per Technical Specification 3.6.1.7 during the event of August 4, 1984.

*Event 1 5/11/84 (LER 84-034-0) Event 2 7/03/84 (LER 84-034-1) Event 3 8/04/84 (LER 84-034-2)

Plant Condition

Event 1 (5/11/84) Plant Mode - 1 Power Level - 1%

Event 2 (7/03/84) Plant Mode - 1 Power Level - 35%

Event 3 (8/04/84) Plant Mode - 1 Power Level - 50%

Event

On August 4, 1984 drywell temperature monitor CMS-TI-55 indicated temperatures above 150°F in the upper drywell area return duct. The temperature exceeded 150°F for over 8 hours and, thus is reportable per Technical Specification 3.7.8.a, although the drywell average air temperature did not exceed 135°F.

Immediate Corrective Action

This condition is considered a part of the ongoing problem identified in Rev. 0 and Rev. 1 of LER 84-034. Consequently, no additional corrective action was initiated as a result of this event.

Further Corrective Action

Modifications to the design of the Drywell H&V are being completed and field changes implemented to correct the high temperature conditions. A final report on the modifications and results achieved will be provided by December 1, 1984.

Safety Significance

The results of local high temperatures have not jeopardized Plant safety or that of the public.

LICENSEE EVENT REPORT NO. 84-034-02

Dear Sir:

Transmitted herewith is Licensee Event Report No. 84-034-02 for WNP-2 Plant. This report is a special report and is submitted in accordance with the requirements of the WNP-2 Technical Specification Section 6.9.2.

Very truly yours

D. Martin (M/D 927M) WNP-2 Plant Manager
