"Braidwood Simulator Facility"  
Certification of Simulator Facility-10CFR 55.45  
NRC Docket Nos. 50-456 and 50-457

Gentlemen:

The purpose of this letter is to submit information pursuant to 10CFR 55.45.b.5 in order to renew the certification of the Braidwood Simulation Facility. This submittal for certification renewal addresses both operating units at Braidwood Station with Braidwood Unit 1 serving as the reference plant. In the section titled "Reg. Guide 1.149 Requirements" of our certification report, the requirements for dual plant simulation facilities are evaluated and the results demonstrate that the Braidwood Simulator's performance compares favorably with each unit. In addition, steady state testing per ANSI/ANS-3.5, 1985 Appendix B was performed prior to the January, 1992, "ready for training" date. These tests compare the Braidwood simulator performance to Braidwood Unit 1 performance with favorable results.

The attachment to this letter contains two NRC Form 474's, ie. one for each docket number and two copies of the Renewal Certification Report, dated April 13, 1992. These documents certify the Braidwood Simulation Facility meets the Nuclear Regulatory Commission's regulations. The renewal of certification of the Braidwood Simulation Facility is being submitted approximately five months early because the simulator software was significantly upgraded in the fall of 1991. After the software upgrade, the simulator was declared "ready for training" on January 13, 1992. It is therefore Commonwealth Edison's intent to continue to utilize this facility to conduct operating tests for Braidwood operators.

The initial certification submittal dated October, 1988, certified the Braidwood Simulation Facility to both the Braidwood Station Units 1 & 2, and the Byron Station Units 1 & 2. This renewal does not address certification of the Braidwood Simulation Facility to Byron Units 1 & 2. Byron operators are currently tested on the Byron Simulation Facility which was certified to Byron Station Units 1 & 2 on August 27, 1991.
