Dear Mr. Hairston:

SUBJECT: WITHDRAWAL OF AN AMENDMENT REQUEST - EDWIN I. HATCH, UNIT NO. 2
(TAC NO. M75621)

By letter dated December 21, 1989, you applied for an amendment to the Edwin I. Hatch, Unit No. 2, Facility Operating License No. NPF-5. The proposed change would have modified the entire Unit 2 Technical Specifications (TS) as part of the Technical Specification Improvement Program (TSIP). The proposed change was based on a standard TS format and content developed jointly by the nuclear steam supply system owners group and the NRC. The Plant Hatch submittal represented the lead plant effort for the General Electric BWR/4s.

Subsequently, by letter dated April 1, 1992, you withdrew the amendment request. Your letter stated that, from the time the 1989 request was submitted, many changes to the industry TSIP effort have taken place, including the NRC issuance for comments of a draft NUREG-1433, "Standard Technical Specifications for General Electric Plants, BWR/4." You also stated that the amendment request withdrawal reflects your assessment that the 1989 submittal no longer represents the industry consensus for content and format. Furthermore, your letter stated that you expect to begin development of a new submittal following NRC issuance of NUREG-1433.

The Commission has filed the enclosed Notice of Withdrawal of Application for Amendment to Facility Operating License with the Office of the Federal Register for publication.

Sincerely,

/s/
Kahtan N. Jabbour, Project Manager
