Approved by: William J. Tobin for 4/24/92
D. R. McGuire, Chief Date Signed
Safeguards Section
Nuclear Materials Safety and Safeguards Branch
Division of Radiation Safety and Safeguards

SUMMARY

Scope:

This special, announced inspection was conducted in the area of the Physical Security Program for Power Reactors. Specifically, Management Support, Plan (and Procedures), Audit, Maintenance and Compensatory Measures were inspected. Additionally, the licensee's corrective actions to a prior violation (91-17-01) were reviewed.

Results:

In the areas inspected, one non-cited violation was identified relative to the licensee maintaining and repairing vital area doors and their associated card readers, as well as improving search equipment and better defining the interior isolation zone of the protected area barrier. The licensee's response to this non-cited violation should improve the prioritization and scheduling of maintenance for security equipment. (NCV No. 92-08-01)

The licensee currently is on schedule to complete all the corrective actions for violation 91-17-01 which will meet, and in some instances exceed, NRC criteria.
