Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-445/92-11; 50-446/92-11

This refers to the inspection conducted by Mr. A. Singh of this office on March 23 through April 3, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Unit 2 facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. These included establishment and implementation of the fire protection program.

During this inspection, the inspector noted that fire protection program implementation was not complete in the areas of fire doors, fire detection and suppression systems, emergency lights, and penetration seals. It is understood that you plan to complete implementation of these areas prior to Unit 2 fuel loading.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified construction deficiencies. The status of these items is identified in paragraph 2 of the enclosed report.
