Ottawa, Canada, K1P 5S9

NOV 22 1995

Dear Mr. Walker:

Please find enclosed a copy of the Radiography Cross-Reference (RADXREF) Program, Version 2.0a, dated October 1995. This program is intended as a licensing guide for compatible models in industrial radiography, as indicated by current registration certificates or appropriate letters from the licensing authority. The Program provides an efficient means for cross-referencing the compatibility of industrial radiography sources, changers, and cameras. The registration certificates should be reviewed for additional details and restrictions and for information about models that are not contained in this program.

You have been assigned a serial number for tracking purposes. To determine the serial number assigned to you, please refer to the serial number printed on the diskette labels. All future updates to the RADXREF program will be made available through the Sealed Source and Device Bulletin Board System (SSD BBS) on FedWorld. For information on using the FedWorld Systems and general commands, please contact the FedWorld help desk at (703) 487-4608. If you are unable to access the SSD BBS, and wish to remain on a mailing list for updates to the program, please notify us within 30 days.

To facilitate transfer of program files, the diskette included is a 3.5" high-density diskette. If you are unable to load the program using the high-density diskette and require a set of low-density diskettes, or if you have any questions regarding the program, please contact me at (301) 415-5868, or Mr. Thomas Rich at (301) 415-7893.

Sincerely,

Original Signed by

Michele L. Burgess, Mechanical Engineer
