Material Licensing Branch
Division of Fuel Cycle and Material Safety
Washington, D.C. 20555

Dear Sirs,

I have reviewed our current license through Admendment #5 dated December 1, 1981. It accurately represents our current and anticipated program with the exception of the name of the individual who directly supervises the use of the material.

In the application for Byproduct Material license submitted September 29, 1981, Tom E. Richardson was listed as the person supervising the use of the material. He is no longer working at this plant.

I submit my name in his place. My training and experience are as follows.

1. Attended a radiation safety school conducted by Ohmart Corporation.
2. Have been responsible for supervision of present equipment and of safety training of people in plant under the direction of Tom Richardson for the past five years.

You can contact me at (319) 399-4075 for any questions regarding this request for license renewal.

Enclosed is a check for \$110.00 covering the renewal fee.

Sincerely,
