

APR 19 1984

Docket No. 030-21011
Control No. 17149

Charles T. Morgan Co., Inc.
ATTN: Stephen Lunn
500 Maple Street
Hathorne (Denver), MA 01937

Gentlemen:

This is in reference to your application dated February 29, 1984, for a byproduct material license. In order to continue our review, we need the following additional information:

1. Please provide a description of the training (including an outline on any formal training) to be provided to your "customers" following the installation of devices at their facilities.
2. Please provide a copy of a typical survey report provided to your "customers" following installation of devices at the "customers" facility.
3. We are uncertain as to the Model Nos. of the source holders which you wish to install since item 8 of your application states, "Drawings of typical Texas Nuclear source enclosures are attached". We plan to only authorize Model Nos. 5190, 5191, 5200, 5202, 5203, 5204, 5205, 5206, 5207, and 5208 since these are the only source holders indicated on the drawings. If you wish to install any other Texas Nuclear gauges please submit the Model Nos. of the additional source holders.
4. The gauges which you intend to install are authorized to be received by individuals having either a specific or general license from the NRC or Agreement State. Do you intend to install Texas Nuclear gauges distributed to individuals having a general license pursuant to Section 31.5 of 10 CFR Part 31?
5. We note that you have indicated in item 1 of your application that you are applying for renewal of License Number 20-13018-03. We believe that this number is in error since your previous license which expired on September 30, 1982, was License Number 20-13018-02. We cannot find any indication in our record that a license 20-13018-03 has been issued by the NRC to your company.
