

December 19, 1995

Mr. E. Kraft, Site Vice President  
Quad Cities Station  
Commonwealth Edison Company  
22710 206th Avenue North  
Cordova, IL 61242

Dear Mr. Kraft:

Thank you for your letter dated November 27, 1995, in response to our September 21, 1995, letter concerning the qualification of drywell ventilation ductwork in the Unit 1 or 2 drywells at the Quad Cities Station.

In our letter, we requested that you determine if commercial grade ductwork was installed in either of the drywells at the Quad Cities Station, and if installed, determine if the ductwork carried sufficient certification to qualify it for its intended purpose. We additionally requested that you submit the results of your investigation to the NRC.

Your response indicated that commercial grade ductwork was installed in the drywell ventilation systems, that the drywell ventilation system was not safety-related, and that material certification was not required on nonsafety-related systems. Additionally, you were unable to identify the individual location of ventilation ductwork described in the September 21, 1995, letter.

We found your investigation to be sufficient to support your conclusions and have no additional questions regarding this matter. We request that you retain the supporting documentation for your investigation for a minimum of one year from the date of this letter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

Your cooperation is appreciated.

Sincerely,

Original Signed by W. L. Axelson
