**VOGTLE ELECTRIC GENERATING PLANT
PROPOSED CONVERSION OF THE UNIT 1 AND UNIT 2
TECHNICAL SPECIFICATIONS BASED ON NUREG-1431**

Gentlemen:

By letter dated May 1, Georgia Power Company (GPC) proposed to revise the Vogtle Electric Generating Plant Unit 1 and Unit 2 Technical Specifications (TS). The proposed changes consisted primarily of a conversion of the existing VEGP TS to the improved Technical Specifications for Westinghouse plants as represented by NUREG-1431. Enclosed is a revision to our May 1, 1995, submittal. This revision is necessary to reflect responses to NRC requests for additional information and our letters dated August 9, 1995, (LCV-0653), September 22, 1995, (LCV-0655), November 20, 1995, (LCV-0670). In addition, this submittal incorporates necessary changes to allow implementation of Option B to 10 CFR 50, Appendix J.

Please note that the revision consists of complete replacements for each chapter of the original submittal with the exception of Chapter 4.0. There were no changes to Chapter 4.0.
