Subject: Response to NRC Request for Additional Information  
concerning TS amendments for Facility License No. R-66.

Dear Mr. Adams:

We have received your request for additional information, and are working to prepare a resubmittal of non-conversion changes to current Technical Specifications for the UVAR, as you requested. In it, we will point out the changes from present TS, as well as rationale for the same. In addition, we will make the format changes and term clarifications that you suggested. However, we will not be able to meet your 30-day return request. Preparation of this material by our small staff is time consuming, and such submittals must be reviewed and approved by our Reactor Safety Committee. This committee meets regularly, but at intervals greater than 30-days. As I commented to you by phone this afternoon, we have no urgency in this matter and the consideration and approval of these TS changes can proceed at normal speed. Thank you for your thoughtful pre-review of our amendment application.

Sincerely,

  
Robert U. Mulder, Director  
U.VA. Reactor Facility

County of Albemarle  
State of Virginia  
I hereby certify that the attached document is a true and  
correct copy of a Letter, presented before  
me this 17<sup>th</sup> day of April, 1992  
by Robert Mulder
