Gentlemen:

SUBJECT: Revision to Proposed Technical Specification Change Submittal Dates

The purpose of this letter is to document notification to the NRC of changes in submittal dates for Technical Specification Changes proposed in References 2 and 3. The changes have been discussed with Messrs. P. H. Harrell and S. D. Bloom of your staff.

Omaha Public Power District (OPPD) committed in Reference 2 to submit a Technical Specification Change to implement the requirements of Generic Letter 90-06 (additional limitations on Power Operated Relief Valves) by the end of the 1992 refueling outage. OPPD requires additional time to complete the processing of this change and is revising the submittal date to no later than June 1, 1992.

OPPD committed in LER-92-028 Rev. 1 (Reference 3) to submit a Technical Specification Change to implement the recommendation of NRC Generic Letter 89-01 (relocate the requirements for Radioactive Effluent Technical Specifications) by April 30, 1992. In preparing this change, it was determined that a minor modification would be required to implement the proposed changes. Additional planning time was required to ensure that this modification could be completed in order to support the amendment request. Therefore, OPPD is revising the submittal date for this Technical Specification Change to no later than June 1, 1992.

If you should have any questions, please contact me.

Sincerely,

*W. G. Gates*
