

JUL 19 1984

Carolina Power and Light Company
ATTN: Mr. E. E. Utley, Executive Vice President
Power Supply and Engineering and Construction
411 Fayetteville Street
Raleigh, NC 27602

Gentlemen:

SUBJECT: FEMA FINAL REPORT - BRUNSWICK NUCLEAR POWER PLANT
EMERGENCY EXERCISE OF MAY 17, 1983

Enclosed are copies of correspondence received from FEMA forwarding their evaluation of the offsite emergency preparedness for the Brunswick exercise which was conducted on May 17, 1983. As described in the enclosure, FEMA has identified a number of apparent offsite deficiencies that need to be resolved.

We understand that many of the identified items may have already been resolved or are in the process of being resolved. We encourage your continued assistance to the State of North Carolina and Brunswick and New Hanover counties to correct all deficiencies noted by FEMA before the next full scale exercise. At that time, all pertinent areas will be re-evaluated, and the results used by the NRC in any decisions pertaining to the adequacy of the state of emergency preparedness at the Brunswick site.

We also encourage you to work closely with the state and counties in the development of a scenario for the next full scale exercise that will test as many of the areas as practical in which the previously identified deficiencies were found.

Your cooperation in this matter is appreciated.

Sincerely,

Richard C. Lewis, Director
Division of Reactor Projects

Enclosure:

Memorandum from R. W. Heim to
E. L. Jordan, dated June 19, 1984
with attachment
