Dear Mr. O'Reilly:

SEQUOYAH NUCLEAR PLANT UNITS 1 AND 2 - NRC-OIE REGION II INSPECTION REPORT
50-327/83-13 AND 50-328/83-13

The following information concerns OIE Inspection Report Nos. 50-327/83-13 and 50-328/83-13 and TVA's response submitted to you from me on October 14, 1983. TVA's response to deficiency 327,328/83-13-08 committed TVA to revise the Sequoyah emergency monitoring implementing procedures and the Muscle Shoals Emergency Center (MSEC) emergency monitoring implementing procedures by January 31, 1984. We provided revised completion dates on January 31, April 2, and May 1, 1984. The SNP emergency monitoring implementing procedures and the MSEC emergency procedures are now complete.

Deficiency 327,328/83-13-08 also committed TVA to the installation of a new communication system by June 30, 1984. We have been unable to complete the intended commitment date due to a delay in material delivery. The material delivery has been rescheduled for July 1984 with a new completion date of September 1, 1984.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
