SUPPLEMENTAL REPORT EXPECTED (14)

YES (If yes, complete EXPECTED SUBMISSION DATE) NO

EXPECTED SUBMISSION DATE (15)	MONTH	DAY	YEAR

ABSTRACT (Limit to 1400 spaces, i.e., approximately fifteen single-space typewritten lines) (16)

During an NRC audit of Dresden Station's compliance with the Fire Protection Technical Specifications it was noted that the Cardox System master valve was not being tested in the automatic mode. The test as written only tested the valve manually. The valve was immediately taken out of service per Technical Specifications and a test of the automatic function was conducted. Following the test the valve was returned to service. The surveillance procedure will be revised to test the valve in both manual and automatic modes.

TEXT (If more space is required, use additional NRC Form 366A's) (17)

During routine NRC inspection of Dresden's Fire Protection Program, it was discovered that no documentation existed to verify that the Cardox system electro-mechanical master pilot valve was operable in the automatic mode. The Cardox System was declared inoperable immediately. An hourly fire inspection was established per Tech Spec 3.12.D.4, with backup fire suppression equipment in unprotected areas.

The electro-mechanical master pilot valve controls the position of each selector valve for U2, U3 and U2/3 (selector valves control the flow of CO₂ into the diesel generator rooms). In Procedure DFPP 4145-1, revision 1, Cardox System Semi-Annual Maintenance Test, the master pilot valve is verified for manual actuation only. Special Procedure 84-5-35 was written, on-site reviewed, and performed to verify automatic actuation. The Cardox System was declared operable at 1530 hours on 5/30/84.

Automatic actuation of the master pilot valve will be added to DFPP 4145-1.

Safety significance was minimal due to the fact that the master pilot valve was verified operable per design in the automatic mode. In addition, each diesel generator day tank was protected by its wet pipe sprinkler system.

This is the first occurrence of this kind at Dresden Station.
