SAFEGUARDS INFORMATION REMOVED

Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NOS. 50-369/92-12 AND
50-370/92-12)

This refers to the inspection conducted by D. Thompson of this office on April 6-10, 1992. The inspection included a review of activities authorized for your McGuire facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The violation is of concern because there were two events where security officers did not remain alert while maintaining compensatory measures for a degraded security system. Further, although a non-cited violation, we are concerned that access control events are starting to occur, particularly, the event where two security officers failed to detect a mis-issued badge.

In addition, as noted above, the enclosed Inspection Report identifies activities that violated NRC requirements that will not be subject to enforcement action because the licensee's efforts in identifying and/or correcting the violation meet the criteria specified in Section VII.B. of the Enforcement Policy. This non-cited violation involved six minor access control events.
