

UNION CARBIDE CORPORATION P. O. BOX 324, TUXEDO, NEW YORK 10987
MEDICAL PRODUCTS DIVISION TELEPHONE NUMBER: (914) 351-2131

August 28, 1984

Mr. Cecil C. Thomas, Chief
Standardization and Special Projects Branch
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Thomas:

Union Carbide was informed via your May 16, 1984 letter that the NRC has reviewed and accepted our Nuclear Facility Emergency Plan. Following your letter we reviewed and updated our Emergency Implementation Procedures to make the Facility Emergency Plan fully compatible with the implementation procedures. Following these procedure modifications the NRC conducted an on-site appraisal of our Emergency Plan. The appraisal team exit interview, conducted by Mr. I. Cohen of Region I, revealed several areas where the NRC may request plan or procedure changes. Union Carbide is presently awaiting the appraisal team's written comments. When we receive these we will expeditiously review and change our plan or procedures as required. After these changes have been made and after all effected personnel and equipment have been updated we will fully implement our plan.

Sincerely,

William G. Ruzicka
Manager
Nuclear Operations
