Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: Hope Creek Generating Station  
Docket No. 50-354  
License Change Request LCR 95-23  
Revision of Surveillance Requirement 4.8.1.1.2

By letter dated October 7, 1995, Public Service Electric and Gas Company submitted the subject request to the Nuclear Regulatory Commission (NRC). The proposed amendment revises Technical Specification Surveillance Requirement 4.8.1.1.2, pertaining to testing of Emergency Diesel Generators. This change would ensure consistency between the required testing methodology and the current licensing basis.

The New Jersey Department of Environmental Protection's Bureau of Nuclear Engineering (BNE) staff reviewed the above amendment in accordance with the requirements of 10CFR50.91(b) and has no comments.

If you have any questions, please contact Rich Pinney at (609) 984-7558.

Sincerely,

Kent Tosch, Manager  
Bureau of Nuclear Engineering
