(b) Letter, Maine Yankee (C.D. Frizzle) to USNRC, "Cycle 15 Startup and Maximum Power Level Commitments", MN-95-140, dated December 22, 1995.

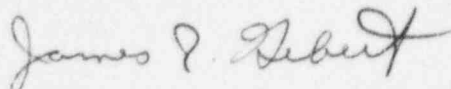

Subject: Correction to Reference (b)

Gentlemen:

In reviewing the information provide to the NRC in Reference (b), we have noted that the power level associated with the Cycle 4 SBLOCA transient has been mistakenly provided as "2560 MW_{th} plus 2% uncertainty" [see the third paragraph of Reference (b)]. This power level should be correctly stated as "2630 MW_{th} plus 2% uncertainty".

We regret any confusion that this error may have caused.

Very truly yours,

James R. Hebert, Manager
Licensing & Engineering Support Department
