

ENCLOSURE 1

NOTICE OF VIOLATION

Entergy Operations, Inc.  
Arkansas Nuclear One

Docket: 50-368  
License: NPF-6

During an NRC inspection conducted on October 29 through December 9, 1995, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions" (60 FR 34381; June 30, 1995), the violation is listed below:

Unit 2 Technical Specification 6.8.1.a, states, in part, that written procedures shall be established, implemented, and maintained covering the applicable procedures recommended in Regulatory Guide 1.33, Revision 2, Appendix A, February 1978.

Regulatory Guide 1.33, Revision 2, Appendix A, February 1978, Section 1.c, states, in part, that procedures should be written and implemented for equipment control. Licensee Procedure 1000.028, Revision 17, "Temporary Modification," governs the implementation of temporary changes to the facility. Paragraph 4.1 of Procedure 1000.028 defines a temporary modification as a temporary alteration made to plant equipment or a system that does not conform with approved drawings or other design documents.

Contrary to the above, on November 13, 1995, the inspectors identified that the licensee had provided the ability to interconnect the service water sides of Shutdown Cooling Heat Exchangers 2E-35A and -35B, a configuration that does not conform with approved drawings, without considering the temporary system as a temporary modification in accordance with Procedure 1000.028. As a result, a safety evaluation for the temporary system was not performed.

This is a Severity Level IV violation (Supplement I) (368/9509-01).

Pursuant to the provisions of 10 CFR 2.201, Entergy Operations, Inc. is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be

modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because the response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if it is necessary to include such information, it should clearly indicate the specific information that should not be placed in the PDR and provide the legal basis to support the request for withholding the information from the public.

Dated at Arlington, Texas,  
this 10th day of January 1996
