

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

AUG 02 1984

257

MEMORANDUM FOR: Harold Denton, Director
Office of Nuclear Reactor Regulation

FROM: Richard C. DeYoung, Director
Office of Inspection and Enforcement

SUBJECT: GRAND GULF TECHNICAL SPECIFICATIONS

At the Commission meeting on July 31, 1984 on enforcement regarding the Grand Gulf technical specifications, Commissioner Asselstine requested that the staff look at licensee submittals after license issuance regarding the technical specifications for possible material false statements by omission or commission. Since your staff is most familiar with the chronology of events and with the associated documentation, I believe that your staff should take the lead in identifying possible material false statements which my staff can then evaluate for appropriate enforcement action.

Your staff should provide the following information:

1. Did any of the licensee's submittals after June 16, 1982 contain false information? If so, identify with particularity the document(s), the false statement(s), and the reasons why the statement was false.
2. For each false statement, indicate whether in NRR's view the statement was material - capable of influencing a reasonable agency reviewer - and, if it was material, provide an explanation why it was.
3. Determine whether the licensee made any material false statements by omission. Did the licensee have opportunities to identify errors in the technical specifications, identify such errors, and fail to tell us about them? If so, indicate with specificity the errors which the licensee failed to report.

Since a Commission paper on this matter is due to the Commission in four weeks, we will need your responses no later than COB August 16.

A handwritten signature in cursive script, appearing to read "R. C. DeYoung".
