Correction of Submittal-
Request to Revise Technical Specifications
Control Room Emergency Ventilation System

Ladies and Gentlemen:

On December 19, 1995, Southern Nuclear Operating Company (SNC) submitted a request to revise "Technical Specifications Control Room Emergency Ventilation System." The purpose of this letter is to correct our submittal concerning the applicability of Specification 3.0.4 to the one-time 30-day extension clause. The existing 10 CFR 50.92 significant hazards evaluation previously submitted by SNC provides a satisfactory basis for stating that Specification 3.0.4 requirements are not applicable during the 30-day extension period. Therefore, this change has no effect on the 10CFR50.92 significant hazards evaluation previously submitted.

The revised typed pages of the proposed technical specifications, including page change instructions, are included in Enclosure 1. The marked pages are provided in Enclosure 2.

If there are any questions, please advise.

Respectfully submitted,

Dave Morey
