Re: Donald C. Cook Nuclear Plant
Michigan Permit No. M00064
Groundwater Limitations

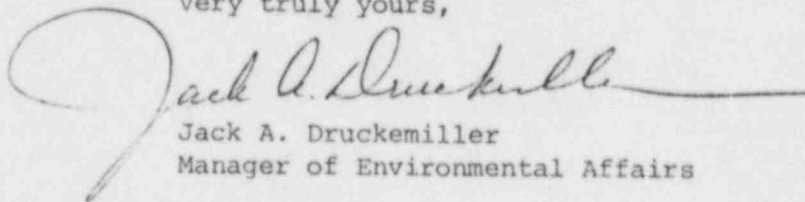

Dear Mr. Zugger:

At 0630 hours, July 25, 1984, the continuously monitoring turbine room sump pH meter was found inoperative.

While repairs were being made, the turbine room sump was manually controlled and allowed to discharge to the plant's absorption pond only after a grab sample verified the pH to be within permit limits.

The meter was returned to service at 0950 hours, July 25.

Very truly yours,

Jack A. Druckemiller
Manager of Environmental Affairs
