Docket No. 50-483

Union Electric Company
ATTN: Mr. Donald F. Schnell
Senior Vice President - Nuclear
Post Office Box 149 - Mail Code 400
St. Louis, MO 63166

Dear Mr. Schnell:

This refers to the routine safety inspection conducted by Messrs. A. W. Markley and D. W. Nelson of this office on April 6 through 10, 1992, of activities at the Callaway Nuclear Power Station, authorized by NRC Operating License No. NPF-30 and to the discussion of our findings with Mr. G. Randolph and others of your staff at the conclusion of the inspection.

Areas examined during this inspection are identified in the report. These areas included radiation protection and transportation programs and outage activities. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations of activities in progress.

During this inspection, certain of your activities appeared to be in violation of NRC requirements. However, as described in the enclosed inspection report, you identified this violation. Therefore, the violation will not be subject to enforcement action because your efforts in identifying and correcting the violation meet the criteria specified in Section VII.B of the "General Statement of Policy and Procedures for NRC Enforcement Actions," (Enforcement Policy, 10 CFR Part 2, Appendix C 1992).

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

"Original signed by Cynthia D. Pederson"
