Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-445/92-10; 50-446/92-10

This refers to the inspection conducted by Messrs. W. B. Jones, G. E. Werner, C. E. Johnson, and T. Reis during the period March 15 through April 25, 1992. The inspection included a review of activities authorized for the Comanche Peak Steam Electric Station, Units 1 and 2. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection included plant status, followup on previously identified items, licensee event report followup, onsite followup of events, operational safety verification, maintenance observation, and surveillance observation. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observation by the inspectors.

Within the scope of the inspection, no violations or deviations were identified.

One unresolved item is identified in paragraph 7.1 of the enclosed report. The item involves the status of work request tags identified in the plant but not readily traceable through the work control program.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
