Perry Nuclear Power Plant Docket No. 50-440 NRC Administrative Letter 94-07 Request

Dear Sir:

As requested by NRC Administrative Letter 94-07, "Distribution of Site-Specific and State Emergency Planning Information", enclosed are ten (10) copies of the Emergency Public Information Calendars distributed through the local counties to the general public within the Perry Nuclear Power Plant (PNPP) 10 mile Emergency Planning Zone (EPZ).

If you have any questions or require additional information regarding these calendars or the PNPP Emergency Preparedness Program in general, please contact Mr. James D. Kloosterman - Manager, Regulatory Affairs at (216) 280-5833.

Sincerely

Domald C. Shelton

Emergency Preparedness Information

ear Resident:

This calendar contains important information you will need if there is an emergency at the Perry Power Plant. That should not happen, but you need to be prepared. You can use this calendar for other kinds of man-made or natural emergencies, too.

In a Perry Power Plant emergency there might be danger from radiation. Too much radiation can be harmful to your health. If a serious accident occurs, you might need to leave the area. Response plans are explained in this calendar; they were written by the groups listed on this page.

This information is important — please read it carefully. Discuss it with your family, friends and neighbors. They may need your help, or you may need theirs. If you know someone who is blind, read this calendar to them. To receive emergency information on an audio cassette tape, contact your county or State Emergency Management Agency listed on this page. Emergency information is also in your local telephone book.

Remember that the best way to stay safe in an emergency is to know what to do. Stay calm and help each other. This calendar is designed to help you. Please keep it handy.

November, 1995

Emergency Information

You May Hear A Series Of Three-Minute Siren Soundings

Listen To Your Radio/TV

If Told To Take Shelter

If Told To Evacuate

When you hear an emergency siren, TURN ON YOUR RADIO OR TV. Sirens will be heard in the area around the Perry Power Plant. You also may be warned by loudspeakers used by local fire and police departments (see page 3). Note: Sirens may be used during any emergency.

The radio and TV stations listed below will carry Emergency Alert System (also known as the Emergency Broadcast System) messages that will tell you about the emergency. It may be a flood, tornado, or nuclear plant emergency. The message will tell you what to do.

Check on your neighbors too; especially the elderly or those who have difficulty seeing or hearing. Make certain they have received the message and know what to do. Be sure they are listening to their radio or TV.

Participating Emergency Alert System (also known as Emergency Broadcast System) Stations

1100 AM

Go inside your house or some other building. Close all the windows and doors. Turn off air conditioners and fans. Use the telephone only for emergency calls.

WWWE Cleveland

STAY TUNED TO YOUR RADIO OR TV FOR MORE INSTRUCTIONS.

to one that does not have a star next to it.

day. If you hear the siren when these stations are not on, tune

Collect the things you will need (see list on page 5). Drive away from the location of the emergency. If you need a place to stay, go to a care center (see list on page 13). If you need directions to a care center, go to a referral point (see list on page 12). If you do not have a

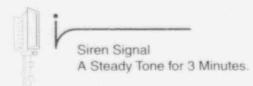

car, get a ride with a friend or neighbor, or go to a pickup point and a bus will come for you (see pages 11 and 12). Evacuating schools will be taken to designated facilities outside the evacuation area. You can pick up your child there (see pages 14, 15 and 16).

When The Sirens Sound

How Will I Know What To Do?

Areas around the Perry Power Plant have emergency sirens. The sirens may sound if there is an emergency. For an emergency at the Perry Power Plant, you may hear a series of siren soundings. The sound will be a steady tone and last for approximately three minutes. You also may be warned by loudspeakers used by fire and police departments. The sirens also have tones that can mean there are other types of emergencies.

When you hear a siren, TURN ON YOUR RADIO OR TV. Tune to a local station. These are listed on page 2. These stations will tell you what to do.

DO NOT call Centerior, the Police, or the Fire Department for information. They need telephone lines open for official calls. Instead, call the Public Information Hotline numbers listed on page 7.

Emergency workers will check to see if you know about the emergency. That is why a green "WE HAVE BEEN NOTIFIED" card is enclosed in this calendar (see last page). To show that you know about the emergency and DO NOT need assistance, put your green "WE HAVE BEEN NOTIFIED" card in a window. Be sure it can be seen from the road. If you don't have a card, or you misplaced it, tie a towel to your door or mailbox or other object visible from the road. Check on neighbors as time permits, especially those who could need assistance. Confirm that they have received the emergency message and know what to do.

Siren Tests

The sirens will be tested at 11 a.m. on the following dates:

Wednesday, January 10, 1996 Wednesday, April 10, 1996 Wednesday, July 10, 1996 Wednesday, October 9, 1996

You need not respond to the test.*

Local advertising and newspaper articles will advise you of tests in advance. But times may arise when a siren will malfunction or sound inadvertently. If you hear an emergency siren and

- A you have not been told of a test
- ▲ it sounds for more than five minutes
- ▲ it goes on and off several times

Call one of the following numbers and report it:

Ashtabula County

Emergency Management Agency	(216)	576-9148
	1-800	-228-6974
Sheriff's Department	(216)	576-0055

Geauga County

Emergency Management	Agency	(216)	285-920	0
Sheriff's Department		(216)	286-123	14

Lake County

Emergency Management	Agency	(216)	951-5252
Sheriff's Department			953-5391

*If you cannot hear the sirens while standing outside, please report this to the appropriate emergency management agency listed above.

What Should I Do If I'm Told To Take Shelter?

What Should I Do if I'm Told To Evacuate The Area?

- ▲ Go indoors and stay there. Shelter pets.
- ▲ Listen to your local Emergency Alert System (also known as Emergency Broadcast System) radio or television station for emergency information.
- ▲ Close all windows, doors, and air intakes (for example: exhaust window fans and fireplace dampers).
- ▲ Turn off air conditioners and exhaust window fans.
- ▲ You might need to warn a friend or family member. If so, limit time spent outdoors. While outdoors, cover your mouth and nose with a damp cloth or towel. When returning indoors, leave outer clothing outside. Wash your face and hands with mild soap and lukewarm water.
- ▲ Children in affected schools will be sheltered there, if necessary. Parents should not try to pick them up unless advised to do so.
- ▲ Listen for instructions on a local Emergency System (also known as Emergency Broadcast System) station.
- ♠ Prepare your home for a three-day absence; turn off small appliances, faucets, and lights. Turn down the furnace, if it is on. Be sure all air conditioners and fans are off. Lock windows and doors.
- ▲ Gather the people in your home. Do not try to pick up children or relatives in schools, hospitals or nursing homes. These facilities have their own emergency procedures.
- ▲ Pack necessities. You will find a list on page 5.
- ▲ Put the green "WE HAVE BEEN NOTIFIED"

 card in a window facing the street. (The green card is the last page in this calendar.) If you don't have a card, tie a towel to your door, mailbox, or other object visible from the road. This tells emergency workers going door-to-door that you know about the emergency. If you DO need assistance, DON'T use the green card or towel.
- ▲ If you have special needs and have already

- ▲ Use the telephone only if necessary.
- Begin storing water in containers for drinking and cooking.
- ▲ Do not pick produce or fruit. Food or produce already in your home is safe to eat.
- ▲ Put the green "WE HAVE BEEN NOTIFIED" card in a window facing the street. (The green card is the last page in this calendar.) If you don't have a card, or you misplaced it, tie a towel to your door or mailbox or other object visible from the road. This tells emergency workers going door-to-door that you know about the emergency. If you DO need assistance, DON'T use the green card or towel.
- ▲ If your assistance needs change after you have displayed the green card or a towel, remove it from view. Then notify your county Emergency Management Agency. See phone numbers on page 6.
 - informed officials, special services will be provided. If you have not informed officials, do not place the green card in a window.
- ▲ If your assistance needs change after you have displayed the green card or a towel, remove it from view. Then notify your county Emergency Management Agency. See phone numbers on page 6.
- ▲ If you have pets or livestock, see page 6.
- ▲ Leave when advised. Use one car per family.

 Close all car windows and vents. Listen to

 Emergency Alert System (also known as

 Emergency Broadcast System) stations for traffic
 information and proceed to a place of your choice
 or to a care center. Use the map on pages 9 and 10.
- Law enforcement officials will control traffic and maintain security in evacuated areas.
- ▲ If you do not drive, get a ride from a friend or neighbor. Or go to a pick-up point (see pages 11 and 12) and a ride will be provided for you.

Preparing For Any Emergency

Prepare in advance for emergencies. Keep emergency supplies in a place known to all family members. Read this calendar. Study the map on pages 9 and 10.

Keep important papers in a safe place. Keep your car filled with fuel. Make a list of things you would take in an emergency. Add them to the list below.

What Should I Take With Me?

Take the things in this list:

- Needed medicines
 Baby food and formula
 Credit cards, checkbook, cash, and important papers
 Two changes of clothing per person
- An extra pair of shoes per person
- Two blankets or a sleeping bag per person
- Toiletries
- Eyeglasses or contacts

Battery-powered radios

- Batteries
- Flashlight
- First aid kit
- This calendar

Where Should I Go?

Where Will Referral Points and Care Centers Be?

How Do I Get There?

What If I Don't Have A Ride?

You can go to a place of your choice. This may be to a friend's or relative's house. You may want to stay at a care center (see page 13). Go to a referral point if you need directions (see page 12).

The care centers will have food, water, medical and social services. They will help you locate family members. They will have a list of people staying there.

Referral points and care centers are shown on a map on pages 9 and 10. Referral points are listed on page 12. Care centers are listed on page 13.

Drive your own car. Take only one car per family. If you have room, you may offer a ride to someone without a car. Use the most direct evacuation route (See the map on pages 9 and 10).

If you do not have a car, get a ride from a neighbor or friend who has room. If this is not possible, proceed to a pick-up point listed on pages 11 and 12. The county will provide rides for those who need them.

What About Children In School?

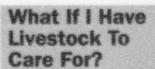

What About Patients In Hospitals and Nursing Homes?

What About The Elderly and Handicapped?

What About Pets? What About Guide Dogs?

Complete information is available from your school. Children will be cared for at receiving schools until parents come for them. Evacuating and receiving schools are listed on pages 14, 15, and 16. Local radio and TV stations also will tell you the names of these schools. During an emergency, you can also get this

information at referral points. Referral points are listed on page 12. The information is available from your school district.

Pre-schools and day-care centers may also have emergency plans. Call the pre-school or day-care center your child attends to learn more.

Information will be available from hospitals, nursing homes, and your county Emergency Management Agency as to where patients will be transferred if an evacuation is recommended.

There will be special assistance for those who need help to leave the area. If you or someone you know may need help, fill out the appropriate card in this calendar, pages 22-24. MAIL IT TODAY. The county will get help to you if you need to evacuate.

To Learn More, Or If Your Special Needs Change, Call:

Ashtabula County

Emergency Management Agency(216) 576-9148 1-800-228-6974

Geauga County

Emergency Management Agency(216) 285-9200

Lake County

Emergency Management Agency(216) 951-5252

Pets

You may not take your pets with you to a care center. Plan now for your pet's care in any emergency. It is recommended that you make prior arrangements with friends, relatives, or pet boarding facilities. If you need more information, call your county Emergency Management Agency.

Guide Dogs

You may take your guide dog with you to a care center. It is recommended that you pack supplies in advance to care for your guide dog. If you need more information, call your county Emergency Management Agency.

LISTEN TO FOUR RADIO OF TV FOR INSTRUCTIONS

If there is an emergency, you may be told to put livestock indoors and give them stored feed and ground water.

If told to evacuate, leave your livestock on the farm. Put them in a barn or other shelter, and leave them with water and food. Plan now for livestock care during any emergency.

Federal and State agencies will do follow-up surveys of farm products to check for contamination. For more information, contact Ohio State University Extension Service. For a copy of the "Radiological Emergency Information for Agricultural Producers, Processors, and Distributors" brochure, contact the State of Ohio Emergency Management Agency, Ohio Department of Public Safety, 2855 West Dublin Granville Road, Columbus, Ohio 43235-2206. Phone (614) 889-7150.

Why Plans Are Required

Why Do We Need Emergency Plans?

What Would Cause An Emergency At The Perry Power Plant?

How Wide An Area Would Be Affected?

Who Decides What The Public Should Do In An Emergency?

Public Information Hotlines The law requires emergency plans for every nuclear plant. These plants have been making electricity for more than 35 years. In all that time, no member of the public has been hurt as a result of an accident at a U.S.

nuclear power plant. But it is best to be prepared. Your county and State Emergency Management Agencies have emergency preparedness plans.

An unusual series of equipment failures or other events could cause an emergency. If radiation might leak from the plant, steps would be taken to protect the public. But your county's and State's preparedness plans cover any kind of emergency ... man-made or natural.

A severe emergency could affect an area several miles from the Perry Power Plant. This could happen if radiation was released and spread by the wind. If the wind is calm, only people closer to the plant might need to take action.

county and State Emergency Management Agencies have plans to protect people in this zone, but they can be expanded to include an area considerably beyond 10 miles. These plans will be used if there is an emergency. Key parts of the plans are described within this calendar.

The area within about 10 miles from the Perry Power Plant is called the Emergency Planning Zone. Your

Your county officials decide what you should do. They will be advised by the groups listed on the back cover. Boaters on Lake Erie will be warned by federal and state agencies.

A public information hotline will be open during an emergency. It will have current information. To use it, call one of these numbers:

Ashtabula County	(216) 576-9148 1-800-228-6974
Geauga County	
Lake County	(216) 953-5468 (216) 953-5470
Centerior	***************************************

State of Ohio Public Information Hotline number will be announced at the time of an emergency.

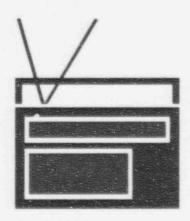

To Learn More, Or If Your Special Needs Change, Call:

Ashtabula County

1-800-228-6974

Geauga County
Emergency Management Agency(216) 285-9200

Lake County
Emergency Management Agency(216) 951-5252

There Are Four Emergency Classification Levels At Nuclear Plants

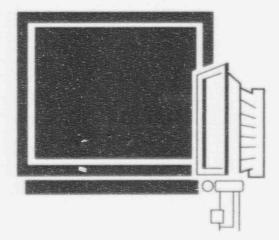

Unusuai Event

A small problem has occurred. No radiation leak is expected. Federal, state, and county officials will be told right away. You will not have to do anything.

Alert

This is also a minor problem. Small amounts of radiation could leak within the plant. This will not affect you. Federal, state, and county officials will be told right away; they will stand by. You should not have to do anything.

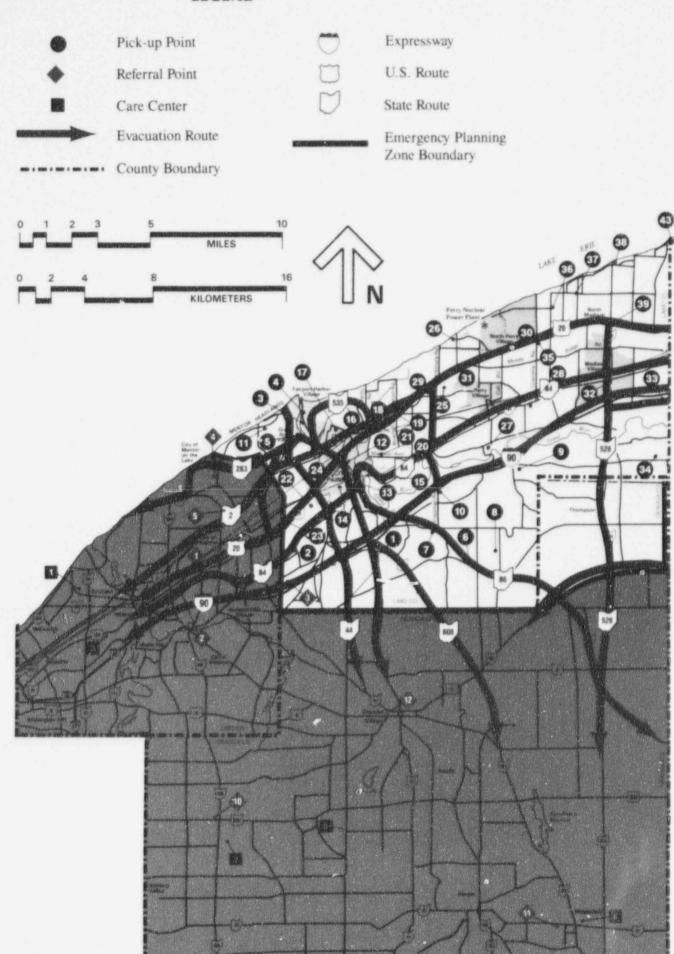

Site Area Emergency

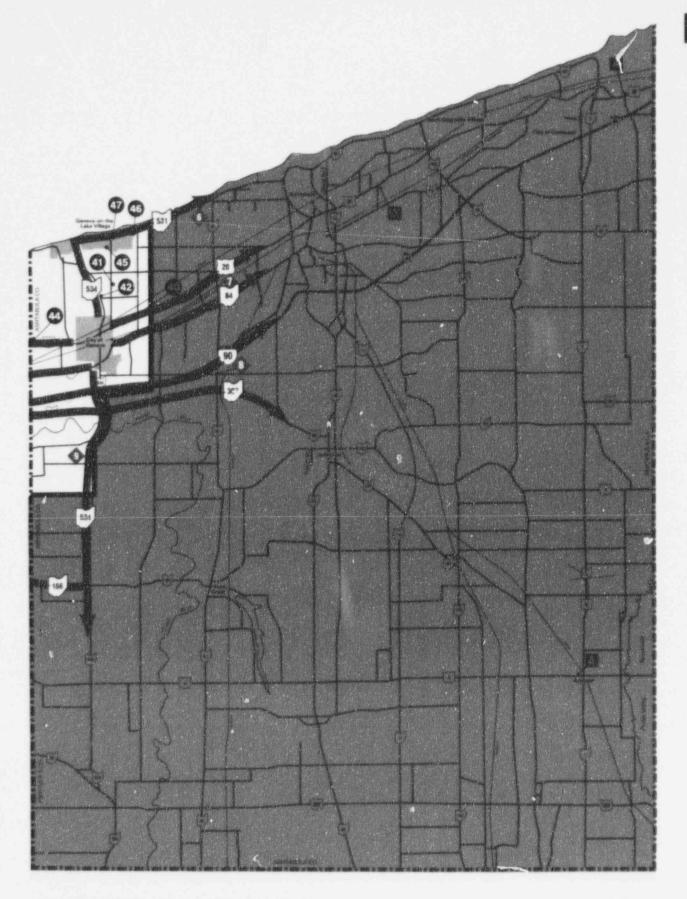

This is a more serious problem. Small amounts of radiation could leak from the plant. If needed, the sirens will be sounded. If you hear the sirens, listen to local radio or TV stations that carry EAS (also known as the Emergency Broadcast System) messages. Federal, state, and county officials will be told right away. They will help if you need to act.

General Emergency

This is the most serious problem. Radiation could be released outside the plant. Federal, state, and county officials will work with plant officials. You may have to protect yourself as described in this calendar. The sirens will sound. If you hear the sirens, listen to your local radio or TV station for instructions.

For Residents Of The Emergency Planning Zone

Radiation and Nuclear Energy

Sources of Radiation

Everything on earth is made up of tiny particles called atoms. Some atoms give off radiation. People cannot see, taste, feel, hear, or smell radiation, but instruments can detect it.

We are exposed to small amounts of radiation every day. It is in the air we breathe. It is in the food we eat. It is even inside our own bodies. It is normal to be exposed to small amounts of radiation. But to be safe, you should limit the amount.

Radiation doses to people are measured in millirem.

The average American receives over 300 millirem of radiation a year from natural sources.

Radiation also comes from man-made sources. It is used by doctors and dentists. It is used in other helpful ways, too.

Radiation levels at nuclear plants are checked constantly. The law limits levels released from a plant. If you would like more information on radiation, write to Centerior, Perry Power Plant, Emergency Planning, P.O. Box 97, Perry, Ohio 44081.

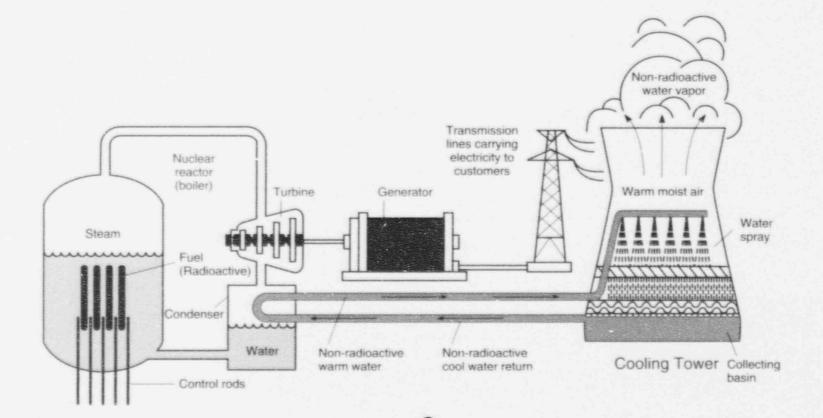

Examples of Radiation Doses:

The earth and air:	56 millirem a year
Natural radioactivity in the body:	
Building materials (brick or stone):	
Chest X-rays:	6 millirem each
Color TV:	less than 1 millirem a year
Source: National Council on Radiation Protection and Measurements (No	CRP Report No. 93), 1987.

Nuclear Energy

The energy of the atom is called nuclear energy.

A nuclear energy plant is much like a power plant that burns coal or oil. The difference is the source of heat. At the Perry Power Plant, heat comes from uranium instead of coal or oil. Uranium atoms are split to produce heat. The heat is used to boil large amounts of water. The water is turned into steam. The steam runs a turbine-generator to make electricity. When uranium atoms are split, radiation is produced. Normally, a nuclear power plant releases very small amounts of radiation as a gas. At most, this will add only one or two millirem to the normal dose received by people who live near the plant. This radiation is less than the limit set by law. No radiation is released from cooling towers.

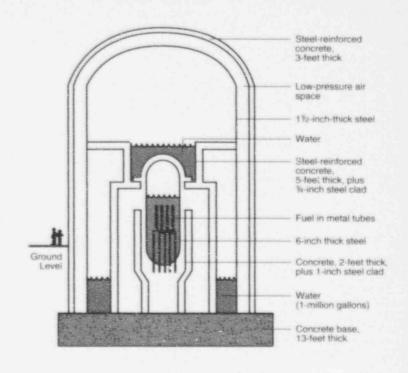

Safety Built In

When a nuclear power plant makes electricity, its fuel becomes more radioactive. But the plant is built to protect the public. The fuel is kept in special metal tubes. The tubes are kept in a steel reactor. Around this are thick walls of concrete and steel

Only a very rare accident could allow too much radiation to escape from a plant. This kind of accident has never occurred in the United States.

In 1979 an accident occurred at the Three Mile Island Plant in Pennsylvania. Larger than normal amounts of radiation were released. However, studies showed they were too small to be a hazard to the public. The highest radiation dose could have been 85 millirem. Only a person who would have stood in the open, day and night, right across the river from the plant could have received that dose. It is about the same as the extra radiation people would receive if they lived in Denver, Colorado for a year. Denver is at a higher altitude. This means people are exposed to more radiation from the sun than those who live closer to sea level.

Emergency Weather Information

Weather related emergencies — storms, tornadoes, blizzards, flooding, — are some of the kinds of emergencies that could happen in this area. These emergencies can be a threat to residents and visitors. The following information will help prepare your family in the event of a weather related emergency.

STORM SAFETY

Thunderstorms can happen at anytime. Severe thunderstorms can bring heavy rains, high winds, and lightning. When severe thunderstorms

threaten your area, listen to your local radio or TV station. These stations will provide updated information. You should know the following terms used to describe storm threats: SEVERE THUNDERSTORM — Conditions are right for a severe storm.

SEVERE THUNDERSTORM WARNING — A severe storm has been observed or has been detected by radar. Take these steps when severe thunderstorms or lightning are a threat.

- Get inside a home, large building, or car (not a convertible).
- Do not use the telephone, except for emergencies. Do not use bathtubs, water faucets and sinks. Metal pipes can conduct electricity.
- A car offers some protection from lightning, but can be a dangerous place to be during a flash flood or tornado.

If you are outside, and there is no time to reach a safe building or car, follow these rules:

- Do not stand under a tall tree in an open area, a hilltop, in an open field, or on the beach.
- Get away from open water.
- Get away from tractors and other metal farm equipment.
- Get away from motorcycles, bicycles, golf carts, and scooters. Do not hold metal objects, such as golf clubs.

Emergency Weather Information (continued)

TORNADOES

A tornado is a violent storm with whirling winds of up to 300 miles per hour. A tornado spins like a top and may sound like the roaring of an airplane

or train. Sirens may sound. When you hear a siren, turn on your radio or TV. Tune to a local station. These stations will provide updated information and tell you what to do. You should know the following terms used to describe tornado threats:

TORNADO WATCH — A tornado may occur in or near your area. Listen to a radio or television station listed on page 2 of this calendar, or another local station in your area. These stations wi:l provide updated information.

TORNADO WARNING — A tornado has been seen, or has been shown by radar. If a tornado warning is given for your area, take shelter immediately.

■ IF YOU ARE AT HOME — go to a corner of your basement and take cover under something sturdy. If your home has no basement, take cover in a small room (such as a closet or bathroom) or under sturdy furniture on the lowest floor in the center part of the house. Stay away

from windows. Do not remain in a trailer or mobile home if a tornado is approaching, take cover elsewhere in a nearby shelter or lie flat in the nearest ditch, ravine, or depression.

- IF YOU ARE IN A BUILDING go to an inside hallway on the lowest floor, or to a designated shelter area.
- IF YOU ARE OUTSIDE take cover and lie flat in the nearest ditch and cover your head with your arms.
- IF YOU ARE IN A CAR get out and take shelter in the nearest ditch, ravine, or culvert and cover your head with your arms.

WINTER STORMS

Areas that normally have mild winters can be hit with a major snow storm, extreme cold or blizzards. You should know the following terms used to

describe winter weather conditions:

ALERT WEATHER RADIOS

emergency conditions. They are available

from local electronic stores. Many differ-

models are recommended for those who wish to purchase the radios. These radios

will activate if there is a weather emer-

radios tune to their Emergency Alert

Station (also known as Emergency

on the alert weather radios.

gency or an emergency at a nuclear power

plant. It is important that owners of these

Broadcast System) upon hearing the tone

ent models are available but tone alerting

are another means of learning about

WINTER WEATHER ADVISORY — winter weather conditions, such as cold, ice, and snow are expected to delay travel, cause major problems, or create other types of dangerous conditions.

WINTER STORM WATCH — heavy accumulations of snow or ice are possible.

WINTER STORM WARNING — heavy snow, sleet, or freezing rain are expected.

BLIZZARD WARNING — heavy snow, winds, and dangerously low temperatures are expected. Blizzards can cause severe weather conditions such as zero visibility and life threatening wind chill.

WHAT TO DO

- Listen to a radio or television station listed on page 2 of this calendar, or another local station. They will provide updates on weather conditions.
- Keep a battery powered portable radio in working order; keep extra batteries.
- Have flashlights, battery powered lamps and extra batteries.

Keep antifreeze in your car's radiator. Carry a winter car kit that includes the following:

Flashlight Tow chain or rope Extra mittens, gloves, hats, boots Windshield scraper

Shovel I

Blanket

If a blizzard traps you in your car:

- Pull off the highway, stay calm and remain in your vehicle.
- Do not set out on foot. A building may seem close but be too far to walk in a deep snow.
- Set your hazard lights to "flashing" and hang a cloth or distress flag from the window or radio antenna.
- If you run your car engine to keep warm, open a window slightly for ventilation. This will protect you from possible carbon monoxide poisoning. Keep snow cleared away from the exhaust pipe.

NOTE: Be careful not to use up battery power. Balance the use of radio, heat, and lights.

In extreme cold, use road maps, seat covers, and floor mats for warmth. Use your coat as a blanket.

Emergency Weather Information (Continued)

FLOODING

Floods are the most common and widespread of all natural hazards. Some floods develop over a period of days, but flash

floods can result in raging water in just a few minutes. Sirens may sound. When you hear a siren, turn on your radio or TV. Tune to a local station. These stations will provide updated information and tell you what to do. You should know the following terms used to describe flooding conditions:

- FLOOD FORECASTS mean rainfall may be heavy enough to cause rivers to overflow their banks or melting snow may be mixing with rainfall to produce similar effects.
- FLOOD WARNING or forecasts of impending floods describe the affected river, lake or tidewater, the severity of flooding (minor, moderate, or major) and when and where the flooding will begin.
- FLASH FLOOD WATCHES mean heavy rains (that may cause sudden flash flooding in specified areas) may occur. Understand that a flash flood can occur without visible sign of rainfall in your area. Be alert to a possible emergency which will require immediate action.
- FLASH FLOOD WARNINGS mean flash flooding is occurring or imminent along certain streams and designated areas. Move to high ground immediately.

WHAT SHOULD YOU DO

- Listen to a radio or television station listed on page 2 of this calendar, or another local station in your area. These stations will provide updated information.
- Keep a stock of food that requires no cooking or refrigeration. Store drinking water in clean, closed containers.
- Keep a portable, battery-operated radio and flashlights in working order; stock extra batteries. Have first aid supplies and any medicines your family may need.
- Learn your community's flood evacuation routes and where to find high ground.
- If instructed, turn off utilities at the main switches or valves. Disconnect electrical appliances, but do not touch any electrical equipment if you are wet or standing in water.
- If your car stalls in a flooded area, abandon it! You and your car could be swept away.

POWER OUTAGE

Here are some suggestions to make your situation easier and safer to deal with while we're working to restore your service.

- Check with your neighbors. If you are the only one without power, or only a few applicances won't work, check to see if a fuse is blown or a circuit-breaker is tripped. If neighbors are without power too, please call 1-800-589-3101.
- Call Centerior Consumer Services 1-800-589-3101.

 Your phone call is the only way for Centerior to know that you're without power. If lines are busy, please wait a reasonable time and call again.
- Listen to newscasts on a battery-operated radio. During major power disruption, announcers often will broadcast reports on the extent of the trouble and the approximate time electric service will be resored.
- Turn off major appliances that should not be in operation when the power comes back on. Do leave a light on so you'll know when normal service has been resotred. Do not use appliances if light is dim, indicating low voltage.

- Open refrigerators and freezers and little as possible. Food will keep for hours if door-opening is kept to a minimum. If the outage is lengthy, contact a dry ice distributor.
- In an emergency, if you cannot reach Centerior, contact the local police or fire department to report downed power lines or other dangerous conditions. They may be able to contact The Illuminating Company or render assistance.
- Stay away from, and never touch, downed lines under any circumstances. Emergency situations and adverse weather conditions place severe demands on utility crews. Your patience and understanding is appreciated.

Employees are working hard to clear hazards and to restore your service as quickly as possible.

Special Needs Removal Card
Do you know of anyone that should be removed from the special needs list? If so, please complete both sides of this card and return it to your county Emergency Management Agency. (Addresses for county Emergency Manage and Agencies can be found on the back cover of this calendar.)

	vidual from the special needs listing.

1996 Calendar

The natural beauty found throughout Lake, Geauga, and Ashtabula Counties is illustrated in this calendar. Unique features of each county are represented: the shores of Lake Erie, covered bridges, farms and wildlife.

A special thanks goes to the employees at the Perry Power Plant for expressing, through photographs, their idea of the beauty of their communities.
