Additionally, in Reference (b), the last paragraph of the response to the Request for Additional Information Item 38 is revised as follows:

With respect to reliance on future actions, 10 CFR 54.21(c) and 54.29 do not specify when re-analysis of all time-limited aging analyses (TLAAs) is required. Evaluation of TLAAs and three equally acceptable actions for addressing TLAAs is described in 10 CFR 54.21(c). The 54.29 finding states that TLAAs are identified and that actions identified have been taken or will be taken with respect to TLAAs. Timing for performing re-analysis of TLAAs will be addressed in the System and Commodity Report for TLAAs which will be submitted later this year.

Should you have further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

for
R. E. Denton

Vice President - Nuclear Energy
