Comments on
"Proposed Generic Communication NRC Bulletin No. 90-01, Supplement 1
Loss of Fill Oil in Transmitters Manufactured by Rosemount"
(57 Federal Register 11732 of April 7, 1992)

Dear Mr. Chilk:

Southern Nuclear Operating Company has reviewed the proposed bulletin supplement, "Proposed Generic Communication NRC Bulletin No. 90-01, Supplement 1: Loss of Fill Oil in Transmitters Manufactured by Rosemount" published in the Federal Register on April 7, 1992. In accordance with the request for comments, Southern Nuclear Operating Company is in total agreement with the NUPARC comments which are to be provided to the NRC. In addition, Southern Nuclear Operating Company provides the following comment:

Reporting requirement 3 requires the licensee to provide a statement (within 60 days after receipt of the bulletin supplement) confirming that Item 3 of Requested Actions has been completed. Item 3 of Requested Actions requires two things: 1) quarterly evaluation of measurement data for comparison with manufacturer's drift data; and 2) 18 month evaluation of all remaining transmitters subject to the enhanced surveillance monitoring program. If the licensee has not been evaluating measurement data quarterly and evaluating remaining transmitters every 12 months then the licensee cannot provide a statement confirming that this item has been completed.
