Subject: Response to Nuclear Regulatory Commission (NRC) Draft Report for Comment on Shutdown and Low Power Operation at Commercial Nuclear Power Plants in the United States, NUREG-1449

Dear Mr. Meyer:

Toledo Edison (TE), a subsidiary of Centerior Energy, is partial owner of and is responsible for operation of the Davis-Besse Nuclear Power Station. Toledo Edison has been authorized for power operation of the Davis-Besse Nuclear Power Station since April 1977. As a 10 CFR 50 licensee, Toledo Edison has a vested interest in any policies the U.S. NRC may adopt which can affect the management and operation of a commercial nuclear power plant.

Toledo Edison has reviewed both the draft report for comment on Shutdown and Low Power Operation at Commercial Nuclear Power Plants in the United States, NUREG-1449, dated February 1992, (TE Log Number 3589) and the comments drafted on behalf of the nuclear power industry by the Nuclear Management and Resources Council (NUMARC). Based on this review, Toledo Edison endorses NUMARC's comments.
