Subject: FUEL DESIGNS USED IN ABWR SAR

In our April 17, 1992, phone call, the NRC requested information regarding fuel designs used as the basis for the analyses contained in the ABWR Safety Analysis Report (SAR). This information is provided in the attached.

The information attached is typical of the level of information provided to the NRC for GE fuel designs. Please note that this information is proprietary to GE.

Please forward this information to the NRC in response to their request.
