Gentlemen:

Subject: Oyster Creek Nuclear Generating Station
 Docket No. 50-219
 Report of Investigation

In March 1992, GPU Nuclear initiated an investigation into the alleged falsification of certain nuclear plant operator log and tour reports at Oyster Creek. This investigation was requested by the Director of Oyster Creek, and was conducted by an independent team of Three Mile Island security department personnel. The findings of the first phase of this investigation were provided by letter dated May 5, 1992.

The second phase of the investigation has been completed. This second phase was conducted in response to the findings of the first phase and in recognition of other similar industry occurrences.

The enclosed report of the second phase of the investigation has been edited to protect the names of the individuals involved; alpha designations are substituted for names. A key to the alpha designations is being provided under separate cover. The unedited report contains details about the personalities, attitudes, activities and job performance of GPU personnel. Public release of such information is likely to subject some individuals to embarrassment, harassment, disgrace, or loss of friends. The resulting invasion of personal privacy would not serve any public purpose. We are requesting, pursuant to 10 CFR 2.790(a)(6), that the key to the alpha designations be withheld from public disclosure and that only the enclosed edited report be placed in the public document room.
