Docket No. 50-353
License No. NPF-4

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT 1
STEAM GENERATOR STARTUP APPROVAL MEETING
WESTINGHOUSE PRESENTATION MATERIALS

On March 2, 1992, Virginia Electric and Power Company and Westinghouse Electric Corporation met with the NRC to present the North Anna Unit 1 steam generator mid-cycle inspection results and request NRC approval for unit startup. Portions of the Westinghouse presentation material were identified as proprietary. Therefore, in accordance with 10 CFR Section 2.790, we are providing, herewith, proprietary and non-proprietary versions of that presentation material. The enclosed WCAP reports provide a compilation of the Westinghouse presentation materials and several pages of supplemental material which were provided to the NRC but not included as part of the March 2, 1992 presentation.

As discussed in our letter dated May 1, 1992, one aspect of the information presented on March 2, 1992 was in error and has subsequently been corrected. The calculated value for primary-to-secondary leak rate as a result of a special main steam line break accident analysis was erroneously reported as 24.2 gpm. The calculated leak rate value for this special accident scenario should be 30.3 gpm. The information contained in the enclosed WCAP report has intentionally not been corrected to reflect this change, i.e., the enclosed material is intended to be the same as the material presented to the NRC on March 2, 1992.

Enclosed are ten copies each of WCAP-13255, Rev. 1, "North Anna Unit 1 Steam Generator Startup Approval Meeting Presentation Materials" (Proprietary) (Attachment 1) and WCAP-13256, Rev. 1, "North Anna Unit 1 Steam Generator Startup Approval Meeting Presentation Materials" (Non-Proprietary) (Attachment 2). Also enclosed is a Westinghouse application letter for withholding proprietary information, CAW-92-289, with accompanying affidavit, Proprietary Information Notice, and Copyright Notice (Attachment 3).

The proprietary aspects of this information is supported by the affidavit signed by Westinghouse, the owner of the information. The affidavit sets forth the basis on which the information may be withheld from public disclosure by the Commission and

addresses with specificity the considerations listed in paragraph (b)(4) of 10 CFR Section 2.790 of the Commission's regulations. Accordingly, it is respectfully requested that the information which is proprietary to Westinghouse be withheld from public disclosure in accordance with 10 CFR Section 2.790 of the Commission's regulations.

Correspondence with respect to the proprietary aspects of the items listed above or the supporting Westinghouse affidavit should reference CAW-92-289 and should be addressed to Nicholas J. Liparulo, Manager of Nuclear Safety & Regulatory Affairs, Westinghouse Electric Corporation, P.O. Box 355, Pittsburgh, Pennsylvania 15230-0355.

Should you have any questions or require additional information, please contact us.

Very truly yours,

W. L. Stewart
Senior Vice President - Nuclear
