

U.S. NUCLEAR REGULATORY COMMISSION

RE: Philadelphia Electric Co. Limerick Gen.Sta.
Units 1 & 2.

Docket : 50-352,353 OL

September 1, 1984

PETITION TO THE COMMISSION FOR AN IMMEDIATE DECISION ON ANTHONY/FOE ^{DOCKETING & SERVICE BRANCH} ALAB-778

'84 SEP -6 P7:02

We are in receipt of an order from the Commission dated 8/20/84 ^{OFFICE OF SERVICE AT DOCKETING & SERVICE BRANCH} which extends the review period for our appeal ALAB-778 to 9/21/84.

Since the review period of 40 days for Commission review expires today, 9/1/84, we respectfully petition the Commission to act immediately on our appeal which was denied by ALAB on 7/23/84.

The fact that the Commission has failed to act on our petition for a stay has caused two thirds of our petition to become moot. We understand that PECO was granted revisions to its fuel license and that the fuel is inside the building and presumably is being stored there. Perhaps it has already been moved into the reactor. This involves the third part of our stay petition, the loading of the reactor through the granting of a low power license. We understand that this license has not yet been granted, but that it may be soon and PECO is planning to load nuclear fuel into the reactor on 9/15/84. In that event our motion for a stay would become moot before the Commission's extended review date of 9/21/84.

We assert that we have satisfied the requirements for a stay as set forth in our appeal and that the evidence we have submitted specifies the threat to our health and safety should PECO be granted a license to operate, because of the safety deficiencies in its equipment, staff and procedures.

We repeat our motion for an immediate stay on the granting of a low power license to PECO and the loading of the reactor with nuclear fuel

cc: Judges Brenner, Cole, Morris ASLB
NRC Staff Counsel, Docketing Serv.,
ASAB, M.J. Wetterhahn, others on Serv. List.

Respectfully submitted,
Robert L. Anthony
