Docket: 50-445/84-21

Texas Utilities Electric Company
Attn: M. D. Spence, President, TUGCO
Skyway Tower
400 North Olive Street
Lock Box 81
Dallas, Texas 75201

Gentlemen:

This refers to the inspection conducted by Mr. W. F. Smith of this office during the period June 14-16, 1984, of activities authorized by NRC Construction Permit CPPR-126 for the Comanche Peak Facility, Unit 1, and to the discussion of our findings with Mr. J. T. Merritt and other members of your staff.

Areas examined during the inspection included preoperational test witnessing and test procedure review. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of testing in progress by the inspector.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Consequently, you are required to respond to these violations in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

Details of this inspection will be included in a report to be issued in the near future and identified as NRC Inspection Report 50-445/84-21.

This office calls your attention to the fact that similar violations were addressed during the exit meeting of June 1, 1984, which will be documented in NRC Inspection Report 50-445/84-18. This indicates that actions taken thus far do not appear to have been effective with regard to procedure compliance.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, P1 96-511.

Should you have any question concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By:
Richard L. Bangart
