

May 14, 1992

Carolina Power and Light Company
ATTN: Mr. R. A. Watson, Senior Vice
President, Nuclear Generation
P. O. Box 1551
Raleigh, NC 27601

Gentlemen:

SUBJECT: BRUNSWICK REQUALIFICATION EXAMINATION REPORT NO. 50-325/92-300

This refers to the Nuclear Regulatory Commission administered requalification examinations led by Bob Holbrook during the weeks of April 13 and April 27, 1992. These examinations were administered to employees of your company who hold licenses to operate the Brunswick Steam Electric Plant. At the conclusion of the examination, the examination questions and preliminary findings were discussed with those members of your staff identified in Enclosure 1 of this report.

Two areas were identified as weaknesses and are in need of improvement. The proposed static simulator examinations and materials show very little improvement, and crew communications and command and control effectiveness have declined since the 1991 requalification examinations.

A Requalification Program Evaluation is provided as Enclosure 2. The evaluation report finds that the Brunswick Steam Electric Plant requalification program is classified as satisfactory. A Simulator Fidelity Report is provided as Enclosure 3. A copy of the written examination questions and answer keys is included in this report as Enclosure 4.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this examination, please contact us.

Sincerely,

(Original signed by A. F. Gibson)

Albert F. Gibson, Director
Division of Reactor Safety
