U.S. Nuclear Regulatory Commission  
Region II  
Attn: Mr. James P. O'Reilly, Regional Administrator  
101 Marietta Street, NW, Suite 2900  
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

BELLEFONTE NUCLEAR PLANT UNITS 1 AND 2 - PRESSURE DROP ACROSS VELAN  
2-1/2-INCH STOP/CHECK VALVE - BLRD-50-438/83-19, BLRD-50-439/83-15 -  
SUPPLEMENTAL REPORT

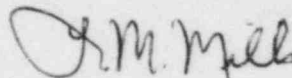

The subject deficiency was initially reported to NRC-OIE Inspector  
A. K. Hardin on February 2, 1983 in accordance with 10 CFR 50.55(e) as  
NCR 2212. This was followed by our interim reports dated March 3 and  
September 20, 1983 and our final report dated January 25, 1984. Below is  
our supplemental report. We consider 10 CFR Part 21 applicable to this  
deficiency.

As discussed with NRC-OIE Inspector C. A. Julian on April 13, 1984, the  
date of April 20, 1984 for completion of corrective actions indicated in  
our final report on this matter would not be met. The replacement discs  
have been received by TVA; however, flushing activities in adjacent  
systems prevent valve disassembly at this time. The corrective action on  
this matter will be completed by May 25, 1984.

If you have any questions concerning this matter, please get in touch with  
R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
