

MAY 14 1992

Docket No. 50-336

Mr. John F. Opeka
Executive Vice President - Nuclear
Northeast Nuclear Energy Company
P. O. Box 270
Hartford, Connecticut 06141-0270

Dear Mr. Opeka:

SUBJECT: REQUALIFICATION PROGRAM EVALUATION REPORT NO. 50-336/92-11
(OL-RQ)

From April 7 - 9, 1992, the NRC administered requalification examinations to employees of your company who operate the Millstone Unit 2 Plant. This evaluation addressed areas important to public health and safety and was conducted in accordance with Revision 6 to NUREG-1021, Operator Licensing Examiner Standards, ES-601, "Administration of NRC Requalification Program Evaluations." The evaluation had two purposes: (1) to evaluate individual operator competency; and (2) to evaluate the effectiveness of the licensed operator requalification training program at Millstone Unit 2. Generic findings and preliminary results were discussed during the interim and at the conclusion of the one week examination period with members of your staff identified in the enclosed report.

The NRC evaluated six Senior Reactor Operators and three Reactor Operators. All operators passed all portions of the requalification examination. There were no crew failures. Section 4.0 of the attached report contains the details of the program evaluation. Because fewer than twelve operators were examined during this cycle, a programmatic evaluation will be deferred until the next NRC administered requalification examination.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosure will be placed in the Public Document Room.
